

# NHMRC Centre for Blood Transplant and Cell Therapy

Supported by Leukaemia Foundation

## Prof Stefan Ciurea

Director Hematopoietic Stem Cell Transplant  
and Cellular Therapy Program,  
University of California, Irvine

***“NK-cell based therapy for  
patients with cancer”***

The Centre for Blood Transplant and Cell Therapies (CBTCT) brings together the largest allogeneic stem cell transplant units in Australia with a focus on identifying transplant and cell therapy strategies to reduce graft versus host disease and improve patient and disease outcomes after transplant. In this webinar series, speakers will review major topics in stem cell transplantation and cell therapy, highlighting how key advances are addressing the current challenges in stem cell transplantation. This webinar features Prof Stefan Ciurea, who is the Director of the UCI Health Haematopoietic Stem Cell Transplantation and Cell Therapies Program and a Professor of Clinical Medicine at the UCI School of Medicine. Prof Ciurea is the author of more than 150 peer-reviewed publications and more than 10 book chapters. He has made important research contributions in the biology of myelofibrosis and haploidentical haematopoietic stem cell transplantation, including the first documentation of the association between anti-HLA antibodies and graft rejection as well as in the development of natural killer cell based therapeutics. In this webinar, Prof Ciurea will be speaking on the utility of NK cell based therapies in improving outcomes of patients with malignancy.

# WEBINAR

## ***Centre for Blood Transplant and Cell Therapies Webinar Series***

Monday 21 March 2021  
12pm (AEDT)

ALL WELCOME TO ATTEND
