

NHMRC Centre for  
Blood Transplant  
and Cell Therapy

Supported by Leukaemia Foundation

## A/Prof Damian Green

Fred Hutchinson Cancer Research Centre,  
University of Washington

***“Enhancing the efficacy of  
immunotherapy for multiple  
myeloma”***

The Centre for Blood Transplant and Cell Therapies (CBTCT) brings together the largest allogeneic stem cell transplant units in Australia with a focus on identifying transplant and cell therapy strategies to reduce graft versus host disease and improve patient and disease outcomes after transplant. In this webinar series, speakers will review major topics in stem cell transplantation and cell therapy, highlighting how key advances are addressing the current challenges in stem cell transplantation. This webinar is presented by A/Prof Damian Green from the Fred Hutchinson Cancer Research Centre, where he leads the translational myeloma research program. A/Prof Green is the Deputy Director for Myeloma of the Seattle Translational Research program with the Department of Medicine at the University of Washington, where his research focuses on the development of novel immunotherapy-based approaches to treat multiple myeloma and other B cell malignancies. In this webinar, A/Prof Green will outline recent advances in immunotherapy for multiple myeloma.

# WEBINAR
