

NHMRC Centre for Blood Transplant and Cell Therapy

Supported by Leukaemia Foundation

The Centre for Blood Transplant and Cell Therapies (CBTCT) brings together the largest allogeneic stem cell transplant units in Australia with a focus on identifying transplant and cell therapy strategies to reduce graft versus host disease and improve patient and disease outcomes after transplant. In this webinar series, investigators from the CBTCT will review major topics in stem cell transplantation and cell therapy, highlighting how the activities of the CBTCT are addressing current challenges in stem cell transplantation. The fourth webinar of this series addresses developments in the field of cellular therapy in the management of two common post-allogeneic bone marrow transplant complications. Professor David Gottlieb will highlight the role of cell therapies in the treatment of opportunistic infections in the post-transplant period, while Dr Siok Tey will review novel cellular therapies for the treatment of graft vs host disease

Speakers

Professor David Gottlieb

Westmead Hospital and
University of Sydney

*Cell therapy for opportunistic
infections in transplant patients*

Dr Siok Tey

Royal Brisbane and Womens
Hospital / QIMR Berghofer
Medical Research Institute

*Cellular therapies for graft vs host
disease*

WEBINAR

Centre for Blood Transplant and Cell Therapies Webinar Series

Thursday 17 September 2020
8am
